Another first: CEOL by Denon. The Freedom of Sound

## **New Network Music System CEOL by Denon offers huge diversity of media paired with Denon high-quality sound**

**September 22<sup>nd</sup>, 2010** – Denon, one of the world’s leading manufacturers of high-quality home entertainment products celebrating 100 years of innovation and technology leadership in 2010, today revealed another first: the CEOL by Denon Network Music System. It integrates Denon hi-fi component sound engineering into compact size featuring the company’s highly acclaimed “simple & straight” circuit design and minimum signal path to optimise performance in sound quality. The new CEOL, consisting of the RCD-N7 network CD receiver and the SC-N7 speaker set, shines with boundless media playback including Internet Radio, network music streaming, iPod/iPhone, USB memory and much more. Denon’s CEOL is also featured in a new video in cooperation with Swedish newcomer band Royal Republic (watch it on Denon YouTube channel: <http://www.youtube.com/DenonEurope>).

The RCD-N7 is a compact network CD receiver that lets users set their iPod or iPhone into a dedicated dock on the top to enjoy music with high-quality digital sound or listen to more than 15,000 Internet radio stations worldwide. A fast broadband connection to the Internet is achieved via an Ethernet cable or wireless LAN (Wi-Fi), allowing for a unique music experience anywhere at home. Since the RCD-N7 supports WPS, it is most easy to connect to a Wi-Fi network and immediately enjoy the benefits like playing music files from a PC or directly from DLNA network hard discs in full Denon sound. The system of course also play CDs, FM/AM radio, and music files recorded on USB memory or other portable media. Despite the RCD-N7’s compact size, it delivers plenty of output power at 65 W + 65 W, filling the listening space with a beautiful, ambient sound. It further inherits and optimising filter to perfectly align with the system’s SC-N7 speaker set characteristics.

In keeping with Denon’s commitment to eco-friendly engineering throughout its product line, the stand-by power of the system is below 0.4W, helping eliminate unnecessary power usage. The new CEOL by Denon will change the way of enjoying music and will be available in a white colour finish from end of October onwards. The RCD-N7 and SC-N7 will also be sold separately to meet every consumer’s demand.
