Easy to use home theatre system with no setup requirements and simplified operation

## **Denon unveils their new high-quality Blu-ray mini system D-X1000BD with versatile connectivity and total ease of use**

**August 4<sup>th</sup> , 2010** – Denon, one of the world’s leading manufacturers of high-quality home entertainment products celebrating 100 years of innovation and technology leadership in 2010, today announced the company’s first 2 channel Blu-ray mini system. Following the successfully introduced upper class 5.1 Blu-ray Receiver Denon S-5BD CARA, the new D-X1000BD as well offers serious audio and video quality with original Denon engineering. This new compact home entertainment solution is either available with or without a unique speaker set that perfectly fits for high-quality performance.

Based on Denon’s experience in offering separate component quality in one compact body as well, the system’s main unit RBD-X1000 is equipped with unique technologies from the company’s renowned stereo and home cinema products. It features a “Simple & Straight” circuit design with minimum signal path, and an independent block construction with a shielded chassis for best playback quality of all content. The powerful mini system with 70W x2 channels supports a variety of digital media such as Blu-ray Disc (including BD Live), DVD and CD. It moreover offers even two USB ports with one at the front supporting iPod/iPhone digital direct play and other USB memory. Through an additional Denon ASD-51N/51W docking station you can even upgrade the RBD-X1000 with network streaming content. For a very private listening experience, the Blu-ray receiver features Dolby Headphone, a revolutionary signal processing technology that delivers 5.1-channel surround sound over any pair of headphones for a richer, more spacious and less fatiguing listening experience.

# Press information

The perfectly matching SC-X1000 2-way speaker set offers serious Hi-Fi quality with parts and technologies from Denon's renowned high end CX stereo series. It features the high performance Denon Dual Layer (D.D.L.) cone with ventilation hole for perfect acoustic balance. Combined with the RBD-X1000, this set forms the D-X1000BD and delivers high quality stereo or home theatre performances. With this system, listeners can even enjoy breathtaking surround sound with Dolby Virtual Speaker, another signal processing technology that delivers 5.1-channel surround sound from just two speakers. In case there is a need for additional bass, the system may be upgraded to 2.1 channels by attaching a subwoofer to the available pre-out port.

Next to the versatile connectivity and the extraordinary sound quality, the new mini system shines with hardly any setup requirements and an easy operation. You just connect the receiver with the speakers delivered and the show begins. The D-X1000BD detects every media automatically and selects the playback mode by itself for total convenience. The remote control delivered with the system has clever quick select buttons and a cursor navigation to easily make adjustments if needed. An intuitive graphical user interface elegantly adds to the ease of use.

The D-X1000BD will be available in a glossy black finish from September onwards.

## D-X1000BD Blu-ray Receiver System at a glance:
